

Galveston County Emergency Communication District

Jack Wilkins, Operations Manager

APPLICATION FOR REGION 51 700 MHz RADIO SPECTRUM

Presented by

Jack Wilkins, Operations Manager

Mr. Douglas Frankhouser, Chairman
NPSPAC Region 51

Dear Chairman Frankhouser:

Galveston County Emergency Communication District 700MHz application.

Galveston County respectfully requests the assignment of thirteen (13) radio channels by Region 51 for the expansion of our existing Regional Project 25 (P25) Trunked Radio System. The addition of these frequencies is required to provide the coverage and loading for the growing number of users in this regional P25 radio system.

The P25 regional system has been established in Walker County and Matagorda County. Montgomery County has recently joined the Regional P25 system; these 6 frequencies we are requesting will be used at existing sites and for system expansion by adding additional sites to increase capacity for users to the system. **This also complies with the new Region 51 700 mhz.plan verbally agreed upon between Harris County, City of Houston, Brazoria County, Galveston County, and Wharton County.**

The requested frequencies are needed to establish a P25 interoperable communication system for migration of the existing 40000 analog users to the P25 digital system. The P25 digital system is designed to bring the regional communications to the highest level of interoperable communications available.

The appropriate APCO, FCC forms and coverage maps have been completed and are attached. Coverage maps follow TIA/EIA TSB 88 guidelines and include interference area studies.

Equipment has been purchased and installed awaiting frequencies.

Implementation will be completed within twelve (12) months after the FCC has authorized the request of frequencies.

Sincerely,

**Bobby Wright, Executive Director
Galveston County Emergency
Communication District**

To Whom It May Concern:

Radio Communications

Adjacent Channel Interference

In all Galveston County radio planning, careful attention is given to minimize radio interference on all radio channels. Most interference can be minimized through proper planning and engineering. However, in some cases, even where proper engineering has been employed, interference can be caused by equipment failure and/ or poor servicing techniques.

Concerning any or all Galveston County radio sites and/or channels, Galveston County Emergency Communication District is dedicated to the highest standards and performance that can be obtained in the industry. In the event of adjacent channel interference, or any type of interference which is caused radio equipment owned and maintained by Galveston County, Galveston County will correct the problem with its equipment or cease operation on that radio channel until the problem is resolved. If the interference cannot be remedied through normal techniques, and there is no equipment problem, Galveston County will remove, re-license, and relocate the interfering radio channel to a new licensed physical location to resolve the problem and to adhere and conform to all standards approved in the NPSPAC Region 51 Plan.

To Whom It May Concern:

This letter is to inform Region 51 that Galveston County will allow Harris County Regional Radio to coordinate the use of the specified frequencies below in other parts of the Region. Frequencies that are licensed to a particular agency will still belong to that agency, but could be used in another part of the region. Below are the frequencies that are currently licensed to Galveston County and the ones that will be assigned to Galveston County for use. We understand the reason that these frequencies are being rearranged in the region is because the City of Houston and Harris County will be going from FDMA to TDMA formats, and that the new arrangement will cause less chance of interference in this region and to the adjacent regions.
